“WE ARE RESPONSIBLE
FOR SECURING A HEALTHY
BIOSPHERE FOR FUTURE
GENERATIONS”

1. CEO-STATEMENT (102-14)

It is an honour to return to Oase Outdoors and take on responsibility as its CEO, working with a highly motivated team in this vibrant industry. I join as challenges continue to flow thick and fast, accelerating the change of global values. As previously highlighted, it is a commercial imperative to effectively address the social and environmental demands made in these enlightened times. And we are working hard to target such issues that our business might impact.

Camping’s popularity continues and much is driven by the need to escape daily pressures by engaging with nature. It reflects the global desire for us all to take responsibility for securing a healthy biosphere for future generations – and this dictates the focus that Oase Outdoors, its stakeholders and target markets place on social and environmental issues.

However, we face a journey of complex social, geopolitical and environmental interactions to reach a sustainable goal. Major issues can only be navigated using current advice to create concrete destinations that can be measured to assess direction and distance travelled.

Given our main footprint continues to be embedded in our trade conducted with independent East Asian manufacturers, this area remains a priority. We recognise that these markets with extended risk demand we maintain preventative anticorruption and social compliance initiatives. Actions are closely monitored and improved in compliance with policy updates from sources that include the EU and UN. Such initiatives see anti-corruption training and working within the amfori BSCI framework help improve working conditions for all in our supply chain.

The well-being of all our colleagues is key to any successful business and our annual Great Place to

Work initiative and targeted surveys continue to help address this important sustainability issue. We are pleased to announce our high satisfaction index score now places Oase Outdoors amongst the highest in Denmark.

Environmental issues are a core consideration for business and consumers alike and we have a deep commitment to fulfil our duty for the greater good. From the reduction of our carbon dioxide footprint to the development and supply of products, we remain committed to fulfilling our responsibilities. We now have our first baseline that delivers our CO2 impact against Scope 1, 2, and 3 levels – the classification system used to help measure, manage and reduce a business’ greenhouse gas emissions. Our ambition is to monitor this and use the data to set new initiatives that will improve results throughout our full supply chain.

Substantial work has been carried out to target responsible sourcing of materials, production, packaging and waste management to preserve resources and safeguard health and the environment. We not only comply with edicts and agreements made by authorized bodies, sovereign governments and governing bodies, like the EU, but aim to exceed requirements by being on the cutting edge of development.

We welcome all to join us in this exciting journey and become a sustainability-conscious business partner to the benefit of all.

Henrik Bernth
CEO, OASE OUTDOORS APS

2. ABOUT OASE OUTDOORS – AND THE REPORT

Oase Outdoors at a glance

Oase Outdoors was founded in 1984 by Mogens Arens in Vejle, Denmark and, while part of the Ratos group since 2016, it is today run by a professional CEO, from the company head office in Give, Denmark. The company specialises in the innovation and development of tents and equipment for camping and outdoor life.

The products are sold through a network of dealers and agents in 45 countries, with main markets being the Nordic countries, UK, Netherlands, Germany and Czech republic. It currently has 80 employees, with showroom in Give, and its own office in Shanghai. This is its fifth sustainability report.

OUR VALUES

INTEGRITY

We strive to be valuable and trustworthy partners in business. We are accountable, and we stick to our agreements.

INNOVATION & DESIGN

We always challenge the standards to create the future within our business.

COMMERCIAL MINDSET

We always optimize commercial terms and seek opportunities. We are never complacent.

WE MAKE IT HAPPEN

There is a short way from idea to action.

ATTENTION TO DETAIL

We emphasize professionalism through attention to detail, precision and follow-up.

ENGAGEMENT

We engage ourselves, we have a 'can do' mentality and we strive to make Oase Outdoors a place where people thrive and develop.

PASSION

We are passionate about Outdoor Living.

2.1. VALUES, PRINCIPLES, STANDARDS AND NORMS OF BEHAVIOUR (102-16)

Oase Outdoors is proud to endorse and maintain the highest business ethics with integrity and our core values at the very heart of everything we do.

Alongside our work on the selected topics here, we are active member of a number of organisations, including EOG (www.europeanoutdoorgroup.com/) and EOCA (www.eocaconservation.org) and we help to bring sustainable development to the top of the European Outdoor agenda.

2.2. ACTIVITIES (102-2)

Oase Outdoors is the parent company to three independent camping and outdoor brands: Outwell®, Easy Camp® and Robens®. Through our brands we aim to be a one-stop shop for those who enjoy camping and outdoor life. Each brand is targeted to meet the needs of three distinct categories of camper:

- Outwell – Innovative Family Camping
- Easy Camp – Entry Level Camping
- Robens – Outdoor and Adventure

We offer a broad range of camping and outdoor products, including:

- Tents
- Camping furniture
- Sleeping bags
- Sleeping mats and airbeds
- A comprehensive range of camping accessories

Our in-house design team creates and develops our products, which we manufacture in China, Vietnam and Bangladesh. The consumer plays a significant role in our design and development process. Via our test family programme, Internet panels and a range of social media engagement and surveys, we strive to maintain consistent focus, always involving the consumer in a constructive dialogue on the development of the camping and outdoor products of tomorrow.

We have numerous patents and innovative IP-protected registrations and Oase Outdoors is one of the market leaders in functional, innovative and easy-to-use camping and outdoor products.

2.3. LOCATION (HQ AND OPERATIONS)

(102-3, 102-4)

Our main office is located at Kornvej 9, DK-7323 Give, Denmark – not far from Billund Airport in West Denmark, which allows us to offer our customers and business partners easy access to our facilities. Our 10,000m² premises houses our highly competent R&D, purchasing, sales, marketing and administration teams. Along with our offices and warehouse facilities, we have an inspirational 2,500m² showroom and large outdoor display areas. Our products are tested both in the Far East and at our own R&D facilities in Denmark, where we operate some of Europe's top test facilities. In addition to our headquarters in Give, we have sales offices in several European countries and an office in Shanghai, China, that helps ensure that we are close to our suppliers. Our Shanghai office has been operational for more than 20 years and is staffed by our own employees.

2.4. Ownership structure / governance (102-5)

Oase Outdoors ownership structure sees Ratos with a 78 per cent interest and the balance spread between Arens and one senior member of the management team. The company is overseen by a Board of Directors comprising four members.

2.5. Markets (102-6)

Oase Outdoors is currently active in 45 countries, with the five core markets being Scandinavia, Germany, the Netherlands, Czech Republic and the United Kingdom.

Each marketplace has a unique retail network that reflects each of the Oase Outdoors brand's target audience and the outlets available to effectively service the product portfolios.

2.6. Value chain perspective

(102-9, 102-10)

While all products are designed at the company's Danish head office, production is carried out in China, Vietnam and Bangladesh. Our Far East network comprises just over 100 suppliers, but with a large concentration of purchase at a top five level. Given our relationship with our suppliers, it is here that we have the greatest positive social and environmental impact on our surroundings and we have had no recent significant changes in our supply chain that could negatively affect our position.

2.7. Scale of the organization

(102-7, 102-8, 102-41)

In 2022, Oase Outdoors employed 80 permanent positions with a 60/40 split between male and female, plus ten seasonal part time workers. Employees outside the Danish head office comprised four in the UK, one in the Netherlands, one in Norway, one in Czech Republic, four in Germany and two in Shanghai, China. We keep 1,600 Stock Keeping Units each season. Annual net sales for 2022 were 421 million dkr – for further financial information please see our annual report at [Ratos homepage, ratios.se](https://www.ratos.se)

3. ABOUT THE REPORT

This is Oase Outdoors' sixth annual sustainability report and covers the 2021 fiscal year. This report references GRI 101: Foundation 2016, GRI 102: General Disclosures 2016 (most disclosures on level Core, see GRI index), Disclosures 103-1, 103-2 and 103-3 from GRI 103: Management Approach 2016, Disclosure 205-2 from GRI 205 Anti-corruption 2016, Disclosure 414-2 from 414: Supplier Social Assessment 2016. The report has not been reviewed in full by a third party. Additional information about our ownership structure, financials and governance can be found on the Ratos website, ratos.se

3.1. Process

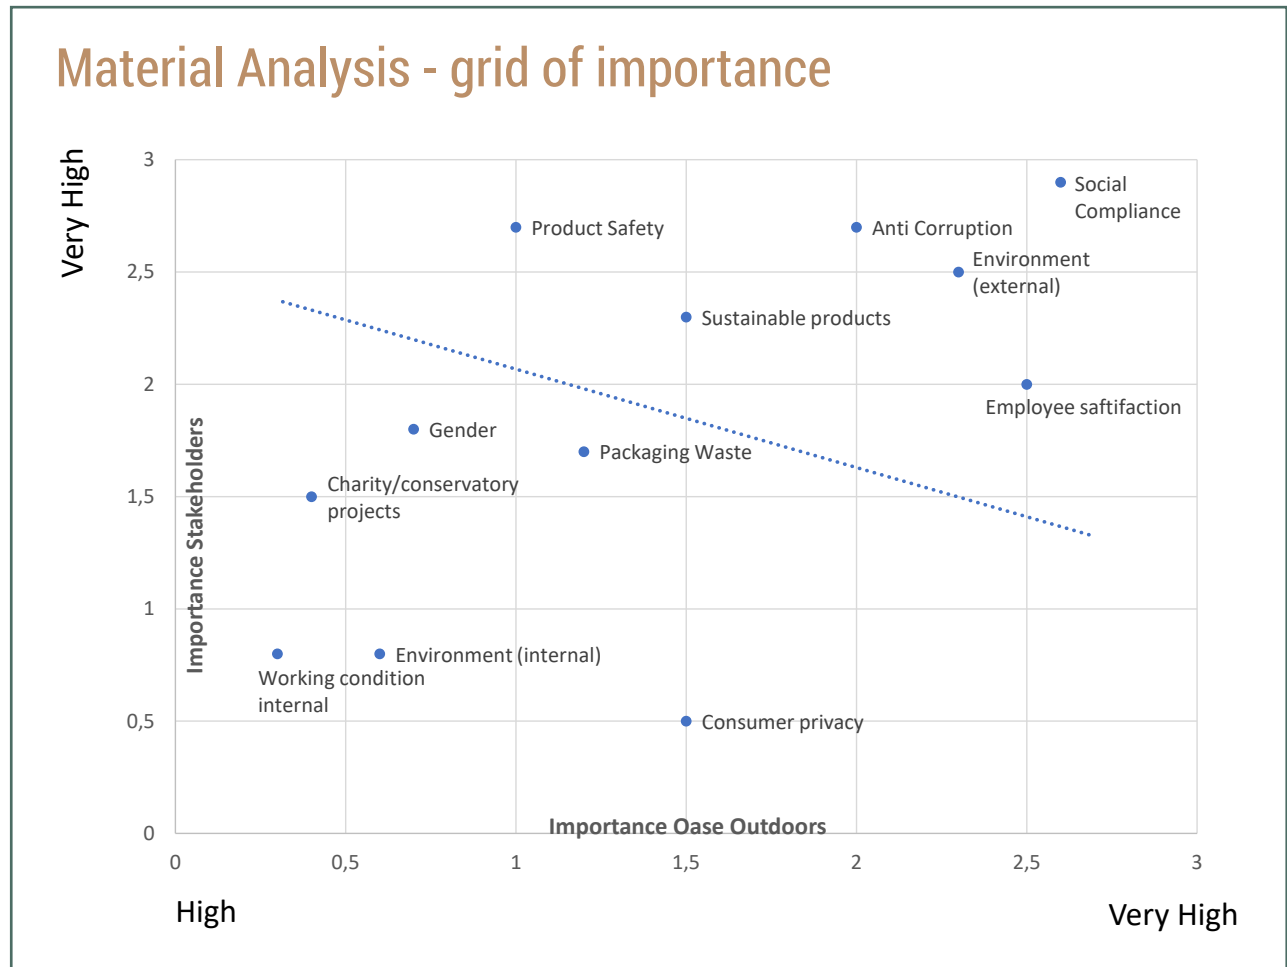

We aim to live up to the ten reporting principles (see GRI framework for more information about these ten principles). This being our sixth report, we are unable to report on all KPIs, but work to address these areas has started and will continue. Product Safety is also one of the key areas found in the material analysis.

Product safety is already high on the agenda and since 2016 we have worked with a specialized company within this area to make sure that our products and procedures comply to the legal requirements in our markets. Product Safety has been omitted in this sustainability report due to resource constraints, but during 2021-2022 we have completed a substantial amount of work

regarding product safety within the area of CE marked products and general product safety.

We first conducted a stakeholder analysis, including a small consultation process with customers and employees. We then analysed our own context to define the key areas in the value chains for us to investigate the impact of our footprint and sustainability. Finally, we targeted

the critical areas that lie above the dotted straight line in the Material Analysis diagram below, for comprehensive action. We did not include all stakeholders. In 2021 we conducted further stakeholder analysis and the area Sustainable products has this year been moved above the dotted line. From 2023, this topic will be included in the report. Packaging waste is also more important.

3.2. Stakeholders

(102-40, 102-42, 102-43 and 102-44)

Given we operate in markets with extended risk, preventative anti-corruption and social compliance initiatives are essential. Our customers and end users also have elevated expectations of Oase Outdoors as a valued partner and home to premium brands.

3.3. Scope

The boundaries of this report are limited to the most important part of our value chain. We are focusing on our suppliers (amfori BSCI) and our own employees (anti-corruption and employee satisfaction level).

List of stakeholder groups and stakeholder engagement

OASE OUTDOORS STAKEHOLDERS AND FORM OF DIALOGUE

Stakeholder	Form of Dialogue	Key topic raised by stakeholder	Topics incl. Yes/No
Employees	Annual employee satisfaction survey with information shared on the intranet	Motivating and developing employees Safe and healthy work environment Reduce climate impact	Y Y Y
Customers	Ongoing part of dialogue in the future	Product safety Reduced climate impact	Y Y
Suppliers	Dialogue, audits, quality control visits and visit from head office staff	Not included in stakeholder analysis	n.a.
Ratos	Board of Directors	Compliance issues Anti-corruption training Wish for Sustainable product category	Y Y Y from 2023
Authorities	Working with Bureau Veritas – a consultancy providing guidance and advice to ensure all legal requirements are fulfilled on products	Product safety Anti-corruption	N Y

3.4. Important subjects

Three key topics have been selected after the materiality assessment (see boxes).

Although not measured to the UN Sustainable Development Goals (SDG) we find it relevant to see our topics in a broader world perspective. Our key topics support among others the below four SDGs.

UN Sustainable Development Goals:

Oase Outdoors KPIs on Sustainability

Related to SDG 8.5

High Risk suppliers (determined by internal risk assessment) to be included in the Business Social Compliance Initiative (BSCI) framework under amfori BSCI. The KPI is to have 19-20 suppliers in BSCI by 2022.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: GRI 400-Social

GRI Disclosure: 414-Supplier Social Assessment

GRI Indicator(s): 414-2: Negative social impacts in the supply chain and actions taken

Related to SDG 8.3

Employee satisfaction min. 80 per cent, measured as Trust Index from the Great Place to Work (GPTW) survey.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: None

GRI Disclosure: Own disclosure

GRI Indicator(s): Own indicator: Trust Index for 2022 in per cent

Related to SDG 12.4 & 13.2

The environment (climate) is being addresses by addressing our CO2 footprint in scope 1,2 and 3 and by a reduction of CO2 each year going forward.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: GRI 200-Environmental

GRI Disclosure: 308-Supplier Environmental Assessment

GRI Indicator(s): 308-2: Negative environmental impacts in the supply chain and actions taken.

Related to SDG 16.5

Compilation of an Anti-corruption policy and implementation of a learning program. Minimum 90 per cent of relevant employees to complete a learning program with the result 'pass', based on a 'Pass/Fail' basis.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: GRI 200-Economic

GRI Disclosure: 205-Anti-Corruption

GRI Indicator(s): 205-2: Communication and training on anti-corruption policies and procedures

4. SUSTAINABILITY SUBJECTS

4.1. Anti-corruption

4.1.1. Why relevant

Not only is the implementation of an anti-corruption policy an Ownership requirement by Ratos and a part of the compliance of doing business, but it is vital to business success as the long-term sustainability of our business depends on our ability to maintain the highest standards of personal and collective integrity.

4.1.2. Scope

Given the need to protect its position as a trusted business partner, relevant Oase Outdoors employees who act under the Oase name will be regulated by this policy.

4.1.3. Management approach

We have developed a strong judicious approach to this area and have started the implementation. A set of directives and FAQs for employees have been made and has now also been stated in the

Employee staff handbook. We have also introduced a whistle-blower system where infringements can be reported in confidence.

4.1.4. Activities

The anti-corruption training is now running at full speed and is being evaluated each year. The HR department is undertaking the training annually and when onboarding new employees.

4.1.5. Results

The anti-corruption policy is now in place. 87% of relevant employees have completed and passed the training in 2022.

4.1.6. Indicators

205-2: Communication and training on anti-corruption policies and procedures.

Share of relevant employees (31) that annually complete the anti-corruption training course is set to 90 per cent.

4.2. Supplier Social Assessment

4.2.1. Why relevant

Mirroring working issues, our biggest social impact is made by sourcing a diverse range of products, often from suppliers located in high risk countries.

4.2.2. Scope

The assessment will include our high, medium and low risk direct suppliers.

4.2.3. Management approach

The Business Social Compliance Initiative (BSCI) is a leading supply chain management system that supports companies drive social compliance and improvements within the factories and farms in their global supply chains. Amfori BSCI implements the principle international labour standards protecting workers' rights. We follow the amfori BSCI framework with commitment and in accordance to the amfori BSCI set up, overseen by a Quality Department member of staff.

4.2.4. Activities

Our goal is still to get 80 per cent of our total buying volume conducted through the amfori BSCI framework. We have again in 2022 performed risk analysis amongst our 105 direct suppliers to know where to put our focus and how to reach our goal. We are fully trained in the framework and confident in using the amfori BSCI platform.

4.2.5. Results

The 17 suppliers in the table to the right have been incorporated into the amfori BSCI framework under where they are measured continuously. These 17 'suppliers' account for 20 factories in total and account for 77 per cent of our turnover.

We are working to raise the numbers of suppliers audited under the framework during 2023. We plan to invite three to five more suppliers onto the framework to increase our purchase volume evaluated through the framework. We expect to reach the goal of 80 per cent during 2023.

4.2.6. Indicators

414-2: Negative social impacts in the supply chain and actions taken.

Determined by an internal risk assessment, we have included the suppliers that will have a significant actual and potential negative social impact if not living up to a framework.

no_	Name	Country	Risk revenue	Category of products	Risk category
9942	Supplier XX	China	H	Tents and accessories	H
9799	Supplier XX	China/Bangl.	H	Tents	H
9860	Supplier XX	Vietnam	M	Tents	H
9752	Supplier XX	Bangladesh	M	Tents	H
9664	Supplier XX	Cambodia	L	Tents	H
9872	Supplier XX	China	M	Sleeping	M
9845	Supplier XX	China	M	Furniture	M
9973	Supplier XX	China	M	Coolboxes	M
9968	Supplier XX	China	L	Furniture	M
9825	Supplier XX	China	L	Sleeping and furniture	M
9745	Supplier XX	China	L	Sleeping	M
9665	Supplier XX	China	L	Pumps	M
9764	Supplier XX	China	L	Sleeping	H
9604	Supplier XX	China	L	Furniture	M
9797	Supplier XX	China	M	Sleeping	M
9672	Supplier XX	Bangladesh	L	Tents	M
9659	Supplier XX	China	L	Furniture	M

High risk = H, Medium risk = M, Low risk = L.

Risk revenue: according to size of business - Risk category: according to strategic importance to us.

4.3. Climate Action

4.3.1. Why relevant

When considering all aspects of our business, our largest environmental impact lies primarily within Scope 3 – We use the scope 1,2 and 3 classification system to manage and reduce our greenhouse gas emissions going forward.

4.3.2. Scope

We will work to become **climate neutral** for our own emissions by 2022 (Scope 1+2). We will do this by reducing our emissions as much as possible and offsetting residual emissions. Going forward, we will actively work **towards reducing the emissions from our entire value chain** (Scope 3), primarily those at our suppliers. Our main emissions – and therefore our main focus – are from our material consumption. We will actively explore alternative product designs and material choices, and by 2023 have set a clear target for reducing these emissions.

4.3.3. Management approach

We will follow ambition to take positive climate action with commitment and set up in accordance to this, overseen by a Procurement Department member of staff.

4.3.4. Activities

Our climate action during 2022 was to achieve results in Scope 1, 2 by creating our first Scope baseline. We started by offsetting our CO₂ impact at our Danish headquarters. We work with Danish company, Klimate, to source and analyse global carbon removal projects to find the best solutions to build on our Scope 1 and 2 aims. With its help, we have combined different suppliers and projects in portfolios that include forestry, enhanced weathering and Ocean Blue Carbon to balance CO₂ removal with our emissions. Our aim is to annually monitor this baseline and use the data to set new initiatives aimed to further improve results throughout the full supply chain. We have appointed a Sustainability Manager to achieve our aims.

4.3.5. Results

We have compensated 132 tons of CO₂ and have achieved CO₂ neutrality at our Danish HQ in Give. We are now able to decide Scope 1+2 activities for the coming period and have geared the organization to take on further sustainability initiatives towards Scope 3 emission going forward.

4.3.6. Indicators

CO₂ offsetting of 132 tons.

308-2: Negative environmental impacts in the supply chain and actions taken.

The CO₂ baseline has been assessed and this will be repeated on a yearly basis. Based on the emission we will set goals for further reductions in all three scopes.

4.4. Employee Satisfaction

4.4.1. Why relevant

Besides our specialist knowledge, our most valuable resource is our employees and it is in our DNA as a family-started and family-run business to foster this special relationship and nurture our workforce.

4.4.2. Scope

Our Employee Satisfaction survey encompasses active full-time employees only and who have worked for Oase Outdoors for a minimum of three months and who is not on leave for more than six months.

4.4.3. Management approach

The survey is conducted by an external independent party and anonymity is guaranteed. Only departments with a minimum of five employees receive a separate report.

5. SUSTAINABILITY REPORT CONTACT

(102-55)

Or at our brandsites:
www.outwell.com
www.easycamp.com
www.robens.de

4.4.4. Activities

The current survey was conducted by Great Places to Work in autumn 2022 and the data was presented in November. All employees have had input on the results at departmental level to help make Oase Outdoors an even greater place to work. The high engagement and impact of the results in each department provide a good indicator for managerial action.

4.4.5. Results

The Trust Index of 92 per cent is a record high level against a KPI of 80 per cent and with a record high answering percentage of 100.

We are now certified as a “Great Place to Work” and part of the run up to become Denmark’s best place to work.

4.4.6. Indicators

There has been a large increase in the Trust Index figures compared to 2021. The result is very satisfying and we are now considered among the top in the Great Places to Work assesment. See table below.

GREAT PLACE TO WORK	OASE OUTDOORS 2022	Oase Outdoors 2019	Oase Outdoors 2020	Oase Outdoors 2021	Oase Outdoors 2022
		CREDIBILITY AVERAGE	78%	81%	85%
RESPECT AVERAGE	78%	76%	83%	89%	
JUSTICE AVERAGE	85%	85%	89%	92%	
PRIDE AVERAGE	83%	85%	88%	93%	
CAMARADERIE AVERAGE	92%	95%	97%	97%	
Trust Index © average	83%	83%	87%	92%	

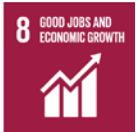

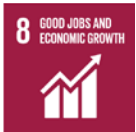

6. GRI INDEX ⁽¹⁰²⁻⁵⁵⁾

We have not had the report audited. There are some limitations to the scope. Further, our materiality analysis is based on a limited

number of customers and employees. However, a substantial amount of internal work has been completed to ensure we target critical areas.
